

**REQUEST FOR AN ADDITIONAL TASK TO BE PERFORMED UNDER THE STUDY REQUEST
No 07.0201/2017/772070/ENV.B.3**

Under framework contract N° **ENV.A.2/FRA/2015/0008**

Title of the Framework contract: "Assistance to the Commission on technical, socio-economic and cost-benefit assessments related to the implementation and further development of EU waste legislation", with reopening of competition.

Pursuant to the above-mentioned framework contract, concluded between the Commission and your company, we request an offer for an additional task specified below and to be performed under the study request No 07.0201/2017/772070/ENV.B.3:

1. Designation of service requested	Assessment of one (1) request for renewal of exemption 39(a) in Annex III to Directive 2011/65/EU, to be performed under the study request No 07.0201/2017/772070/ENV.B.3 (Pack 15)
2. Requester (name and function)	Director, Kęstutis Sadauskas
3. Specific terms of reference	See annex
4. Estimated duration of the work (calendar days)	See annex
5. Maximum budget available for the services	
6. Expected result	Final report with scientific and technical assessment of the requests as per specific terms of reference
7. Requester's address (to which the offer is to be sent)	European Commission DG Environment, Directorate B, Unit B3 F.a.o. Karolina Zázvorková BU 9 5/106 B – 1049 Brussels
8. Requester's signature (K. Sadauskas)	
9. Date of signing request	

Thank you in advance for responding rapidly to this request by submitting an offer in accordance with the provisions of the framework contract within 10 working days. Please also advise the Commission services with 5 working days if you do not intend to submit an offer.

Annex: Specific terms of reference

**Annex: Request for an Additional task to be performed under the study request
No 07.0201/2017/772070/ENV.B.3 – 'Specific terms of reference'
(under Framework contract ENV.A.2/FRA/2015/0008)**

Assessment of one (1) request for renewal of exemption 39(a) in Annex III to Directive 2011/65/EU, to be performed under the study request No 07.0201/2017/772070/ENV.B.3 (Pack 15)

1. Context/General Information

The Commission is launching this contract for:

- the evaluation of application for the renewal of the exemption 39(a) listed in Annex III to Directive 2011/65/EU (RoHS 2), to be performed under the study request No 07.0201/2017/772070/ENV.B.3 (Pack 15).¹

The RoHS 2 directive (adopted in June 2011 and to be transposed by the Member States by 2 January 2013 at the latest) restricts the use of certain hazardous substances in electrical and electronic equipment.

RoHS is regularly updated according to scientific and technical progress. The adaptation to scientific and technical progress is reflected in the lists of specific exemptions from the substance restrictions, in Annexes III and IV to RoHS 2.

Annex III is for all RoHS electrical and electronic equipment (EEE), while Annex IV is exclusively for medical devices and monitoring and control instruments.

Any adaptation of the above mentioned Annexes allowing the limited use of hazardous substances needs to follow specific requirements. In particular:

- Articles 4(1) and 4(2) provide that Member States shall ensure that EEE (as referred to in Articles 2(1) and 3(1)) placed on the market, including cables and spare parts for its repair, its reuse, updating of its functionalities or upgrading of its capacity, does not contain the substances listed in Annex II. The maximum concentration value by weight in homogeneous materials as specified in Annex II shall be tolerated.
- Annexes III and IV to the Directive currently list a limited number of applications which are temporarily exempted from the requirements of Article 4(1).
- Adaptation of the Annexes to scientific and technical progress is provided for under Article 5 of the Directive. Pursuant to Article 5(1), the inclusion in or deletion from above mentioned Annexes of materials and components of EEE shall be adopted by the Commission by means of individual delegated acts.
- Article 5(1)(a) provides that the Commission can adopt measures to adapt the Annexes III and IV to exempt materials and components from the RoHS substance restrictions only if this does not weaken the environmental and health protection of Regulation (EC) No 1907/2006 and if any of the following conditions is fulfilled:

¹ OJ L 174, 1.7.2011.

1. their elimination or substitution via design changes or materials and components which do not require any of the materials or substances referred to in Article 4(1) is scientifically or technically impracticable;
 2. the reliability of substitutes is not ensured;
 3. the total negative environmental, health and consumer safety impacts caused by substitution are likely to outweigh the total environmental, health and consumer safety benefits thereof;
- The decision on inclusion of materials and components of EEE in RoHS 2 Annexes III and IV on exemptions and on the duration of possible exemptions shall take into account the availability of substitutes and the socio-economic impact of substitution. Decisions on the duration of possible exemptions shall take into account any potential adverse impacts on innovation. Life-cycle thinking on the overall impacts of the exemption shall apply, where relevant.
 - Pursuant to Article 5(2), all exemptions have expiry dates and can only be renewed following an application for renewal. Regarding the treatment of applications for renewal the same criteria apply as for new exemptions.
 - On the basis of these provisions, the Commission is receiving requests for (granting, renewing, but possibly also for revoking) exemptions that need to be evaluated in order to assess whether these requests fulfil the requirements of Article 5(1). Where the requirements of Article 5(1) are fulfilled, the Commission shall adopt a measure (delegated directive) amending the respective Annex to the RoHS 2 Directive.
 - An application for granting, renewing or revoking an exemption shall be made to the Commission in accordance with Annex V. This annex specifies the mandatory content of an application.
 - In April 2018, the Commission received two requests for a renewal of the exemption no. 39(a) of Annex III: **Cadmium selenide in downshifting cadmium-based semiconductor nanocrystal quantum dots for use in display lighting applications (< 0,2 µg Cd per mm² of display screen area).**

2. Subject of the study

- (1) The Commission needs clear technical and scientific evidence and an assessment of any request for granting, renewing or revoking an exemption in light of the criteria listed in RoHS 2, notably the provisions cited above, taking into consideration the differing validity periods and expiry dates for the various product categories. The number of reviewed applications under this additional assessment is **2 (-two-) exemption in total**.
- (2) Stakeholder/public consultations are to be organised in order to fulfil the first objective (as described in detail below).

3. Tasks to be performed

This evaluation is to be performed as an additional exemption assessment under Task 5 ("Exemption assessment") of the study request No 07.0201/2017/772070/ENV.B.3 (Pack 15) as specified in the respective "Specific terms of reference".

Task 1: Assessment and evaluation of the exemption request under RoHS 2

The consultant shall provide technical and scientific evidence and an assessment including comparative information on the costs and benefits of the exemption concerned under RoHS 2 Annexes, as indicated by the Commission.

The assessment shall comply with the requirements of RoHS 2 and be in line with the Commission's mandate for an Annex review. The consultant shall discuss and agree the detailed boundaries of the assessment with the Commission services at the beginning of the project.

Building on the criteria set out in Article 5(1)(a), the consultant shall provide a clear assessment and evaluation of whether the respective exemption is justified in line with the requirements of RoHS 2, clearly specifying which criterion that allows granting the exemption is verified;

- Clearly identify the specific application for which the exemption is requested and, where applicable following the assessment, propose a precise wording for a possible exemption;
- Assess why the restricted substance is currently required or used, and the quantity of the restricted substance present/needed for that function in the specific application;
- Assess if the elimination or substitution of the restricted substance via design changes or different materials and components is currently technically or scientifically possible;
- Assess if the elimination or substitution of the restricted substance via design changes or different materials and components is currently technically or scientifically practicable;
- Assess whether the reliability of substitutes is ensured;
- Assess the availability of substitutes;
- Assess if the (total) negative environmental, health and/or consumer safety impacts caused by substitution are likely to outweigh the (total) environmental, health and/or consumer safety benefits; life-cycle assessment on the overall impacts of the exemption shall apply, where relevant.
- If suitable substitutes exist, assess, the case given, why they are not used;
- Assess whether a possible exemption would be in line with Regulation (EC) 1907/2006 (REACH), and indicate possible problems;

- Identify any possible adverse impacts on innovation, in particular in relation to the length of a possible exemption;
- Assess any similar applications in which the substances (or their substitutes) are used and why they are not suitable for the application in question;
- Assess, if possible, what efforts have been made by the applicant for an exemption to investigate if alternatives are available/what efforts are being made by the applicant to develop alternatives;
- Assess if alternative techniques or materials will be available by a proposed expiry date of an exemption / any other date;
- Identify and assess (see below) the socio-economic impacts of substitution;
- Work in close liaison with the Commission and, in consultation with the Commission, with the applicant or other stakeholders concerned, relevant trade associations and non-governmental organisations; any other inputs received in the context of the public consultation will be equally assessed;
- Having regard to confidentiality issues, ensure, inter alia through setting up a dedicated website, that all relevant stakeholders will receive all the necessary information about launching and progress of the project and be given the opportunity for a timely and appropriate contribution and participation. The same information will be published online. This exercise shall be conducted following the minimum standards for consultation set in the Commission Communication COM(2002) 704 final of 11.12.2002;
- Consider previous assessments of the exemption requests published at http://ec.europa.eu/environment/waste/rohs_eee/studies_rohs1_en.htm.

The above list is not exhaustive.

In order to assess and provide complete information also on the socio-economic impact, the contractor shall consider (separately for each request) the two following scenarios, in a time horizon corresponding to the recommended exemption duration:

1. Business as usual, where the substance substitution in the EEE is governed by market forces (by granting the exemption requested);
2. Rejection of the exemption request and consequent prohibition of the placing on the EU market for the EEE concerned;

The consultant shall assess for each scenario by also building both on own research and on documentation provided by the Commission:

1. Volume of EEE concerned placed on the EU market annually;
2. Impact on employment in the EEE concerned industry and related upstream and downstream supply chain in the EU (job losses/gains), taking into account the manufacturer's geographical distribution; list of main EU manufacturers should also be provided;

3. Additional costs (money expenditure) through substance substitution in the EEE divided into sectors (private, industry, public);
4. Generation of additional waste;
5. Reduction in amount of restricted substances placed on the EU market.

The different impacts of substitution triggered by the exemption request rejection should be expressed not only in absolute terms, but also in differential terms in comparison to the scenario where the substitution is left to the market (exemptions request accepted).

Task 2: Stakeholder Consultation

The consultant shall organise and perform stakeholder consultations stated in the "Specific terms of reference" to the study request No 07.0201/2017/772070/ENV.B.3 under Task 6 ("Accompanying stakeholder consultation").

4. Guide and details of how the tasks are to be carried out

The tasks shall be delivered at the same time as tasks specified in the "Specific terms of reference" to the study request No 07.0201/2017/772070/ENV.B.3.

The execution of the tasks may not start before the contract has been signed. The contractor shall start working immediately after the signature of the contract.

Frequent contacts with the Commission can take place during the elaboration of the study in order to provide for a smooth and effective exchange as necessary. The contractor shall be available for clarification requests from the Commission (by email or phone) following the publication of the study until the Commission adopts the decision on the requests concerned.

The contractor does not have the authority to publish the deliverables without prior authorisation from the Commission. All matters related to this study should be treated with confidentiality.

5. Estimated expertise requirement

Expert workload corresponding to maximum [REDACTED] (including all contractor activities mentioned in this document, and possible travel and subsistence costs).

6. Estimated timetable:

The timetable specified in the "Specific terms of reference" to the study request No 07.0201/2017/772070/ENV.B.3 shall apply to this contract.

➤ **Budget:** [REDACTED]
